PRODUCT INFORMATION

MINOX DIGITAL CLASSIC CAMERA 5.1 Gold Edition

A touch of luxury – exclusive special edition of a legendary classic camera

Great attention to detail and a little bit of luxury – these are features of the new Digital Classic Camera MINOX DCC 5.1 that is now available in an exclusive 24-carat gold-plated special edition. Devotees to classic design and legendary German precision engineering from the fifties will find it hard to resist these magnetic looks. A convincing combination of innovative technology and timeless elegance makes this extravagant 1:3 scale masterpiece an unmatched synthesis of classic and modern features.

On the outside the new MINOX DCC 5.1 Gold Edition - like its sister model with silver metal finish - is designed in the style of rangefinder cameras from the nineteen fifties – but on the inside it is packed with the convenient technology and desirable features of today. The 5.1 megapixel hardware resolution, a 2-inch monitor and a filigree plug-on viewfinder make this refined and elegant product a real cult object. With the 5.1 megapixel resolution pin-sharp images can be captured with high detail rendition. The 2" screen complements the optical viewfinder and helps

the user compose the subject. It also displays information on the selected camera settings. The video mode additionally captures film sequences in AVI format. All data are stored on an internal 128 MB memory or on external SD cards with a capacity of up to 16 GB. The power supply for the camera is provided by a replaceable Lithium-Ion battery.

The optional accessories boast both visual and functional features to round off this impressive edition. The filigree plug-on viewfinder, for example, can optionally be protected by a miniature leather case.

The DCC 5.1 Gold Edition comes in a satin-lined wooden box. The scope of delivery also includes a Lithium-Ion battery, power pack, USB cable and a User Manual.
