

## PRODUCT INFORMATION

### MINOX MD 62 ED SILVER SPOTTING SCOPE IN MINOX FORMAT

The ability to draw in distant objects close enough to touch! This is also something many nature observers and birdwatchers desire. With the new spotting scopes, MINOX MD 62 and MD 62 ED, MINOX has now supplemented its sport optics program to meet this requirement. Here again the MINOX values of compact design, quality and precision are consistently applied, as with all products from MINOX in the field of sport optics. The new spotting scope weighs just 930 grams and with its dimensions of 328x99x89 mm it is one of the most compact models available.

The MD 62 ED version uses a new type of ED fluoride glass which guarantees absolutely neutral colour rendition even in critical light conditions. The optical designers attached

particular importance to an extremely short focusing distance and it is therefore possible with the MD62 to observe everything which grows, blossoms and moves in the area in the closest detail, yet remaining at a safe distance. Even just 5 meters away!

The sturdy metal housing protects the precision mechanical parts and precision optics against harmful influence from the outside and the nitrogen filling prevents misting up of the optical system on the inside, even under extreme temperature fluctuations. The three eyepieces, 20-45x, 22xww and 40x, complete the new MD range of spotting scopes. These ensure a universal application and with the bayonet mount system it is instantly ready for use.

Being a legendary camera manufacturer, MINOX has, of course, also provided an appropriate photo adapter for use with all camera systems via T2 mount.

A nylon ever-ready case with a unique design perfectly complements this new MINOX product and can be optimally used with a tripod, whenever required.

#### Accessories

- Eyepiece with variable magnification 20 - 45x
- Eyepiece 22 x WW
- Eyepiece 40 x
- Photo adapter
- Delivery includes a nylon ever-ready case

#### Technical data
