

PRODUCT INFORMATION

The MINOX BV 8x25 and MINOX BV 10x25 Waterproof compact binoculars with metal body

The German optics specialist is extending its binocular and spotting scope segment with two new compact binoculars from the successful BV line. Watertight, with optional 8x or 10x magnification, the MINOX BV 8x25 and BV 10x25 are compact binoculars designed for universal application. They are particularly valuable companions when handy and light-weight baggage is required – whether for traveling, sports, hunting or observing animals and plants. Boasting an exceptional price/performance ratio they are also the perfect choice for those looking for a top quality, yet still affordable gift.

When it comes to technical features compact binoculars from MINOX rank in a class of

their own! Thanks to the modern optical system the BV 8x25 and BV 10x25 guarantee unadulterated viewing enjoyment with high image contrast and excellent detail rendition. All glass/air surfaces feature a multicoating for maximum light transmission and stunning brilliance of the image without interfering reflections.

The extremely sturdy aluminum body ensures reliable functioning of all optical systems and precision mechanics on the inside. An innovative sealing technology provides protection against dust and water. The BV 8x25 and BV 10x25 withstand moisture penetration up to a pressure of 0.3 bar or a comparable water depth of three meters. This also makes

them suitable for extreme wind and weather conditions. Nitrogen filling of the binoculars ensures permanent protection against corrosion and prevents fogging of the glass surfaces on the inside, even with severe and sudden temperature fluctuations.

With their extended eye relief the new binoculars of the BV line ideally meet the individual requirements of people wearing eyeglasses, enabling them to enjoy the entire field of view without vignetting. Twist-type extendible rubber eye cups for setting the interpupillary distance are another convenient feature. The central joint mechanism enables fast individual adjustment of the distance between the objective lenses. The aluminum body has non-slip rubber armoring giving the new compact binoculars from MINOX a good and safe hold at all times.

The scope of delivery of the new MINOX BV 8x25 and MINOX BV 10x25 includes a nylon strap as well as an ever-ready case.
