

PRODUCT INFORMATION

MINOX ACX 100 HD Action Cam

Adventures in High Definition

Whether in a moment of freefall, in the half-pipe, on the ski slope or out biking; the new MINOX ACX 100 HD Action Cam is the ideal companion when pursuing leisure activities, extreme sports or just pure action. The maximum full HD video resolution of 1080p, a 135° super wide-angle lens as well as a memory capacity of up to 32 GB guarantee long-lasting dynamic action. Thanks to the multi-optional mounting kit and the compact rugged and watertight body this new ACX 100 should not be missing on any occasion or adventure.

Battery	Internal, 1000 mAh rechargeable Lithium-ion
Length	110 x 35 mm (LxW)
Weight	approx. 124 g
Product design	VOLKSWAGEN Design
Order number	61607

The high quality camera module with a 135° super wide-angle lens guarantees top imaging quality and high contrast through its automatic exposure control and white balance. With the rotating camera module horizontal shots are

always captured even in unusual mounting positions and camera settings. The intuitive operation using just one button as well as a fast and simple mounting ensure comfortable and convenient handling. Additionally, the ACX 100 can be separated quickly from the adapter at any time and reconnected again for shooting. This means that the camera can be safely and reliably kept in a jacket or trouser pocket when not in use.

Every video shoot is additionally recorded with sound to enable an effective playback with vivid sound later on.

The scope of delivery includes a 4 GB SD memory card with a storage volume for 45 minutes full HD recording. It is also possible to use memory cards with up to 32 GB.

The MINOX ACX 100 has a rechargeable and replaceable battery. This offers the user the

advantage of being able to insert another battery to continue the recording if low temperatures reduce the capacity of the one initially installed.

The scope of delivery of the ACX 100 includes an adapter with fixing strap and mounting pad for cycling and skiing helmets, a rechargeable lithium ion battery, a 4 GB SDHC memory card as well as a USB cable.

Other mounting kits and an underwater body are also available as accessories.
